Time taken	44 secs
Marks	6.00/6.00
Grade	100.00 out of 100.00

Question 1

Correct

Mark 1.00 out of 1.00

LOC-based estimation techniques require problem decomposition based on

Select one:

- ☐ a. information domain values
- ☐ b. project schedule
- ☒ c. software functions ✓
- ☐ d. process activities

The correct answer is: software functions

Question 2

Correct

Mark 1.00 out of 1.00

-----cohesion is difficult to automate

Select one:

- ☐ a. Syntactic
- ☒ b. Semantic ✓
- ☐ c. Internal
- ☐ d. None of the above

The correct answer is: Semantic

Question 3

Correct

Mark 1.00 out of 1.00

The four basic steps in software project estimation are:

1. Estimate the size of the development product. { either Lines of Code (LOC) or Function Points (FP)}
2. Estimate the effort in person-months or person-hours.
3. Estimate the schedule in calendar months.
4. Estimate the project cost in dollars (or local currency)

Select one:

- ☒ True ✓
- ☐ False

The correct answer is 'True'.

Question 4

Correct

Mark 1.00 out of 1.00

Cyclomatic complexity measures software complexity from the machine's viewpoint in terms of how the size of the input data affects an algorithm's usage of computational resources (usually running time or memory)

Select one:

- ☐ True
- ☒ False ✓

The correct answer is 'False'.

Question 5

Correct

Mark 1.00 out of 1.00

Cohesion is of two types, Internal and Syntactic.

Select one:

- ☐ True
- ☒ False ✓

The correct answer is 'False'.

Question 6

Correct

Mark 1.00 out of 1.00

4. A ----- is a path that begins and ends at the same node whereas a ----- is a circuit with no node (other than the starting node) included more than once

Select one:

- ☐ a. Cycle, Circuit
- ☒ b. Circuit, Cycle ✓
- ☐ c. Valid, Invalid
- ☐ d. None of the above

The correct answer is: Circuit, Cycle
